Acknowledgments iii

Foreword v

Preface vii

Chapter 1: Context and Concepts 1

 From pins to computers 1

 Ancient history: Cartography and crime mapping 3

 Mapping as a special case of data visualization. 6

 Mapping as art and science. 7

 Maps as abstractions of reality: Benefits and costs 10

 Crime incidents: Measuring time and space. 11

 Map projection. 13

 Coordinate systems 15

 Map elements: The usual bits and pieces 17

 Types of map information. 18

 Scale 21

 Maps of crime: Thematic maps 23

 Data, maps, and patterns 25

 Other theoretical perspectives 28

 A note on cartograms. 30

 Reminder: Information is inevitably lost in the process of abstraction 30

 A note on the maps in this guide. 30

 Summary 31

Chapter 2: What Crime Maps Do and How They Do It 35

 What crime maps do 35

 How crime maps do what they do. 38

 Choosing a crime map 40

Contents

Examples of thematic maps	40
Classifying map information	49
Maps and statistics: Exploratory spatial data analysis	53
Map design	57
Design, abstraction, and legibility	61
Summary	63
Chapter 3: Maps That Speak to the Issues	67
Patrol officers	67
Investigators	70
Police managers.	71
Maps in support of community oriented policing and problem oriented policing	80
Maps and community policing: The city of Redlands, California, approach.	82
Courts and corrections	84
Policymakers: The medium and the message	87
Community organizations	88
Conclusion	89
Summary	90
Chapter 4: Mapping Crime and Geographic Information Systems	91
The GIS revolution	91
The GIS perspective	94
Spatially enabling the data: What is geocoding?	97
Data selecting, filtering, and mapping according to useful criteria	100
Selecting and displaying specific information	100
Using GIS to measure from maps: Aggregating data	105
Derivative measures: How to create new indicators	109
GIS as a tool for data integration and exploration	110
Hot spots	112
Buffering: Meaning and applications	118
Data, data, everywhere: What's an analyst to do?	121
Cautions	124
Summary	125

Chapter 5: Synthesis and Applications 127

Synthesis 2000 127

Mapping applications for the millennium 136

Crime analysis and the census. 146

Conclusion 147

Summary 148

Chapter 6: Crime Mapping Futures 151

Geographic profiling 152

High-resolution GIS 155

Forecasting: Complex statistical methods and crime mapping 155

Digital aerial photography in policing. 159

The Integration of GIS and GPS 164

Conclusion 167

Summary 168
